About Us

The Devaraj group was started way back in the year 1984 when our founder Mr. D.VALAYAPATHY along with his two brothers started the very first fruit pulp processing plant in krishnagiri which was a small canning unit.

The 3 decades of experience in the industry enabled Mr. D.VALAYAPATHY to start sreedev agro foods which commenced its operation in the year 2011 in krishnagiri tamilnadu. It is a state of the art aseptically processed fruit pulp and concentrate manufacturing unit handling a capacity of 7 tons per hour.

Our factory's proximity to other fruit cultivation states like Andhra and Karnataka gives it a unique advantage with regards to fruit availability and procurement during the season.

Mr. D.V.Rajeshkumar son of Mr. D.VALAYAPATHY has also joined the family business from 2011 and is actively involved in the running of its day to day affairs.

Our 2nd plant sre devaraj agro foods was brought into operation in the year 2021 with a capacity of 9 tons per hour. Currently the combined processing capacity of both our plants is 15 tons per hour.

PRODUCTS	BRIX AT 20°C	ACIDITY % AS CITRIC ACID	CONSISTENCY (CM/30 SEC @ 20°C)	pH
ALPHONSA MANGO PULP	Min 16°	0.45 - 0.80	<12	<4.0
